Executive Summary

Mission and Values: EZLock's mission is to prioritize customer satisfaction by exceeding expectations by facilitating top-quality products and services. EZLock is dedicated to meeting the unique needs of high schools by offering spacious lockers with keypad entry, ensuring convenience and safety. With a commitment to innovation, integrity, and valuing customers, EZLock strives to deliver a locker solution that enhances the school experience for students and faculty.

Management Team Plan: EZLock's management team, led by CEO Dylan Spitzfaden and CFO Vishaan Shah, brings a wealth of experience and expertise to the company. Dylan, with a background in reporting and leadership roles, oversees the company's operations and strategic direction, while Vishaan, leveraging financial acuity and a commitment to excellence, ensures the company's financial stability and growth. Supported by key advisors including a Power Electronics Engineer and a Patent Lawyer, EZLock is poised to transform its innovative locker solution into a tangible reality, backed by efficient service providers and a dedicated team committed to success.

Company Description: EZLock founded by Vishaan Shah and Dylan Spitzfaden, addresses the common challenges faced by high school students regarding limited locker space, back strain from heavy backpacks, and the inconvenience of traditional combination locks. By combining modern technology with durable materials, EZLock offers spacious lockers with keypad entry, providing students with a secure and convenient storage solution. With a focus on increasing security, promoting convenience, and enhancing organization, EZLock aims to revolutionize the school locker industry, Ultimately fostering safer and more organized learning environments for students.

Product and Service Plan: EZLock offers a revolutionary solution to the high school locker market, introducing lockers with keypad entry technology. In contrast to traditional lockers, EZLock's keypad entry system enhances convenience and security for students and administrators. With competitive pricing at $455.50 per individual unit, EZLock provides efficiency, reduced backpack usage, and alleviated back strain, positioning itself as a leader in innovative locker solutions. Supported by a robust supply chain involving reputable manufacturers and distributors, EZLock ensures the seamless delivery of its innovative lockers to schools across the Mid-Atlantic region.

Industry Analysis: EZLock operates within the industrial sector, specifically targeting the locker market, offering innovative keypad entry systems for school lockers. As indicated by the analysis of the industry, the industrial sector, including the locker market, is experiencing steady growth and increasing investor interest, providing a stable environment for EZLock's expansion. With projections showing continued market expansion and advancements in smart locker technologies, EZLock is well-positioned to thrive in this sector, leveraging its unique product offering to meet the evolving needs of schools and students. Additionally, micro and macro influences, such as maintaining strong relationships with stakeholders and adapting to economic changes, play crucial roles in EZLock's long-term success.

Market Analysis: The Market Analysis details the demographic of EZLock, which are Gen-X School Administrators. The data analyzes the primary age group of school administrators, then specifies the details of their job lives, aspirations, and opinions. With this, EZLock was able to analyze and design a proper product suitable for the demographic, ultimately increasing the likelihood of purchase.

Competitive Analysis: The section is composed of an analysis of competition and value through EZLock and its direct and indirect competitors. The goal of this is to differentiate EZLock's product from the competition by describing each company's information. It specifies benefits, reviews, history, and other factors. Additionally, the SWOT analysis indicates the strengths, weaknesses, opportunities, and threats of EZLock and Penco Products, its direct competitor. This provides EZLock with room for improvement and the ability to thrive more in the smart locker market.

Marketing Plan: The marketing plan consists of branding and promotional items. The logo and slogan were created uniquely to define the company clearly. The advertisements integrate high-quality designs and persuasive items to encourage the purchase of the product. Lastly, the product, price, place, and promotion are incorporated in an aligned manner to satisfy the customers' needs and build a framework for the overall marketing plan.

Organization Plan: The organization plan is composed of 4 significant occupations that play a crucial role in EZLock. They reside in unique sectors and have their salaries detailed. It also describes the owners of the company, as well as their roles.

Mission Statement

- Hallowell
  - Mission Statement: “We are committed to meeting the needs of our customers, and we strive to exceed their expectations. We believe that quality is essential to success, and we are dedicated to providing our customers with the best possible products and services” (Hallowell).
- Wurth Baer Supply Company
  - Mission Statement-Wurth Baer Supply Company
    - “Provide the best value to our customers through a combination of product availability, service, and price.”
    - “Handle all customer inquiries and concerns with courtesy, respect, professionalism, and a high sense of urgency.”
    - “Maintain strong, effective partnerships with our vendors, and inventory their products in sufficient breadth and depth to meet projected customer demand.”
    - “Carefully plan and execute all phases of our procurement, warehousing, order processing, and distribution operations to maximize their accuracy, speed, and efficiency.”
    - “Continuously pursue process improvements, technological innovations, and value-added service opportunities.”
- Hertz Furniture
  - Mission Statement: “Hertz Furniture is committed to offering top quality, competitively priced furniture that meets your needs. We strive to provide the best customer experience possible, whether you're buying a single chair or furnishing an entire campus” (Hertz Furniture).
- KitLock
  - Mission Statement (KitLock)
    - Live by Family Values
    - Work with innovation and integrity
    - Put customers first

It is evident that these locker market companies only contain mission statements, thus we will only incorporate a mission statement in our business plan.

EZLock’s Mission Statement is to empower students with convenient and secure storage lockers.

Management Team Plan

Key Executive Summaries

Executive Name and Title	Dylan Spitzfaden and CEO	Vishaan Shah, CFO
Proposed Salary	$141,000	$110,000
Primary Duties and Responsibilities	Mr. Spitzfaden's main responsibility is to make the final decisions over all of the company's operations. He is responsible for the vision and direction of the company.	Mr. Shah's primary responsibility is to regulate financials and to work towards keeping statistics high and profitable. The role of the CFO has evolved to be an advisor and even partner of the CEO. Some specific roles are communicating with stakeholders, undertaking major financial decisions, and partaking in negotiations.
Experiences	*Reporter*, Manalapan-Englishtown Middle School ("MEMS") TV: Reported school news through the morning announcements *Hall Supervisor, St. Thomas More Church*: Monintered the hallways during religious education *Student Council Class Representative/Electee for Treasurer, Pinebrook School*: Served as a member of the student council and ran as an electee for treasurer	Learned to package and supply food and materials to impoverished individuals in Neptune. Transported seniors and lab specimens throughout Centrastate Hospital Collaborated with volunteers within Monmouth County to provide meals and clothing Presented information to the Period 1 class regarding school announcements, events, etc.
Skills and Traits	• Good communication skills • Creative • Willing to talk to others • Microsoft/Google Suit • Italian beginner	• Clear communicator • Open to discussion • Social • Spanish beginner • Microsoft/Google Suit

Key Advisors

Key Advisor	Information	Relevance
Power Electronics Engineer	Name: Sotiris Zorbas Company: Frenetic/Self-employed Address: Trikala, Greece Phone: N/A Email: sotiris.zorbas@frenetic.ai Equity Share: 2% of net profit Summary: Sotiris is a man with 7 years of experience. He works with electronics, designing, and troubleshooting. Additionally, he aligns with persistence and analytical values, as he states he possesses a positive mindset. Thus, he is a dedicated and hard-working individual who would be beneficial to EZLock.	A Power Electronics Engineer can allow EZLock to transform the idea into a physical idea. He specializes in product design and is a hardware designer. Thus, with a 100% Job Success Advisor, EZLock will be able to make this idea tangible and improve the lives of many in the near future.
Patent Lawyer	Name: Guy Tucker Company: Janah and Associates Address: Somerset, CA Phone: (612) 9393-0100 Email: gtpatents@gmail.com Equity Share: 1.5% of net profit Summary: Guy Tucker has worked as a patent agent since 1991. He is familiar with the process of finding a patent and will be able to quickly patent EzLock's product. Guy has two degrees, so he is knowledgeable in multiple areas. Therefore, he is a good fit for EZLock.	Obtaining a patent for a product can be difficult especially when people do not know the process. Since Guy is knowledgeable about the process, he will be able to quickly obtain a patent for EZLock's product. Getting a patent is important for the product because it allows for EZLock to protect its intellectual property.

Service Providers

Service Provided	Name of Provider	Reason Required
Locker Repair Service	**N D SECURITY CO** 4.8 stars, Google Maps Reviews Van Transportation, in the area New Jersey, NJ., 07834 (973) 625-5602 ndsecurity@hotmail.com	If there were installation errors or certain lockers, these workers could easily fix the issue with their quick and efficient process, allowing for a smaller distraction in the school and a better look for the EZLock.
Internet Provider	**AT&T** 4.8, Google Maps Reviews 67 US-9, Morganville, NJ New Jersey, NJ, 07751 (732) 504-8333 10-digit wireless number, followed by @txt.att.net	AT&T is considered one of the most prominent and efficient internet providers in America. One of their plans, 500Mbps1, is suitable for EZLock's company office (unless an incubator is selected), as it is $65/m + taxes.
Employee Payroll Service	**Justworks** 4.1 stars, Forbes Review 55 Water St. New York, NY, 10041 (888) 543-1711 support@justworks.com	Justworks is one of the highest-rated employee payroll services within the industry. By putting Justworks in charge of the employee payroll, EZLock has more time to focus on other areas of the business such as the products. EZLock will still be able to set the salaries without having to manually make the payments.
Distribution Service	**Fulco Fulfillment Inc.** 4.8 stars, Google Reviews 26 Richboynton Rd. Dover, NJ, 07801 (973) 361-1700 sales@ffiweb.com	Fulco Fulfillment Inc. is recognized as one of the most reliable distribution services in NJ. Since they are local, they will easily be able to pick up EZLock's products. Also, outsourcing the shipping will help EZLock save money from having to ship and store these products by themselves.

- Google Suite and Microsoft — *Present*
  - Efficient in using different applications

Interests

- Yankees
- Bike riding

Company Description

Business focus and company history – how you came to be & what problem did you solve?

Mr. Spitzfaden and Mr. Shah are high school students who understand the pain of heavy backpacks and the inconvenience of using school lockers. Locks are unpredictable and often get jammed making the user late to class. Students often forgo using their lockers and instead carry around heavy backpacks, coats, and sports gear throughout the day. So, with thorough research and planning, EZLock created a spacious and efficient locker to reduce backpack crowding. Currently, EZLock focuses on empowering students with convenient and secure storage solutions.

Entrep opportunity (market – economy, etc..)

There is a growing need in schools for convenient and secure storage for students. Students carry around all of their supplies all day, which is a hassle. Traditional lockers are an inconvenience for students as regular combination locks can be time-eating and frustrating. This is supported by a poll conducted by Alliance High School as it shows that “out of the 204 student responses, 8.8 percent said they do in fact use their locker — 91.2 percent said they do not use their locker at all. 20.6 percent affirmed that it's important to use a locker — 79.4 percent said it's not” (Source). EZLock provides an innovative solution to this problem with keypad entry. Students will be able to get rid of their heavy load of supplies and access them easily throughout the day by using their code. This frees them from carrying extra weight and makes them feel more secure putting their items in locker storage. This will allow students to focus on learning without having to worry about forgotten combinations. EZLock’s keypad entry lockers are a game-changer for schools, providing students with security, convenience, and overall satisfaction.

Legal structure and reasoning

An LLC would be beneficial in the formation of EZLock's business because it has numerous benefits:

(NestApple)

- Easy to start up
  - There is less paperwork and costs
- Contains limited liability
  - Liability does not fall on the owners of the company
- Has Unlimited Members
  - There are no restrictions on the amount of members that companies can have
- Has Unrestricted Pay
  - No limits on income
- Tax Flexibility
  - Company owners can select how they are taxed

Business concept: explanation of your product and/or service

EZLock's product incorporates modern technology with the basic locker structure and materials to provide students with an efficient and capacious space to store unrequired items throughout the day. Primarily, high school students do not utilize their lockers due to trouble with combination locks (Source) and limited space (Source). However, EZLock's improved school lockers will result in efficient stops to lockers and space for every book and binder. In detail, these lockers are measured with a maximum capacity of 11.25 cubic feet, or dimensions of 18" wide, 15" deep, and 72" high. Additionally, the locker does not require the combination lock, but instead a digital keypad that requires a 4-digit code to unlock the locker. Instead of an intricate system with spindles, dials, latches, and other manual locker components, the advanced model unlocks a deadbolt, the steel piece that keeps a door locked, when the correct pin is inserted. (Source: KeyPad Door) The keypad requires two CR123A 3v lithium batteries to allow for long-lasting life of the system. However, the key feature that differentiates EZLock from any other school locker is its safety mechanisms. Multiple remotes are dispersed throughout the school, and when necessary, users can simply press a button, which sends an infrared signal to all lockers in the area to deactivate until reactivated with a remote. Ultimately, EZLock aspires to make high schools a safer and less stressful environment, both physically and mentally.

Stakeholders

- EZLock
  - CEO
    - Dylan Spitzfaden
      - 42% Stake
  - CFO
    - Vishaan Shah
      - 42% Stake
  - Key Advisors
    - Sotiris Zorbas
      - Designs products and constructs website
      - 3% stake
    - Guy Tucker
      - 1.5% stake
      - Establishes patent
  - Employees
    - 10% stake
    - Payment is dispersed among all employees
  - Additional stakeholders who are not members but have vested interests include suppliers and vendors
  - Taxation: Members of an LLC are taxed individually as it has pass-through taxations (members will be responsible for filing returns for federal and state taxes)

USP

- Increased Security:
  - Students will be able to safely store their items in their locker using a personal code, reducing the risk of theft
  - Numerous remotes are provided that can terminate the functionality of all lockers in the area with the click of a button
    - Can be reopened with a button as well
- Convenience
  - The keypad allows for easy access throughout the day and students will not have to carry around heavy items such as jackets and heavy textbooks
- Organization
  - Due to the large amount of space in the locker, students will have plenty of room to organize their supplies instead of having clutter in classrooms and backpacks
- Peace of Mind
  - Students will not have to worry about their items being stolen from their locker throughout the day and will be able to focus on school work

Goals and objectives: intent for expansion

Mission statement: Empowering students with convenient and secure storage solutions.

This statement focuses on EZLock's main function: providing lockers for students to secure their items. It emphasizes that the lockers provide security and convenience, which are valued in a school environment

Vision statement: To be the leading provider of innovative locker systems that create secure and organized learning environments in schools.

This statement expands on the mission statement by emphasizing EZLock's goal of being the leading provider of lockers in the industry. It highlights the innovation of EZLock's locker system and how it affects the learning environment in schools.

Key collaborators

- Crowdfunding
  - EZLock will utilize the prominent website KickStarter in order to receive funds
  - In return, donors will receive a pack of EZLock pencils
  - Fund requested:

Licenses and Permits

- Local building department permits
  - EZLock will need to get a permit from the school building for the installation of the lockers, permits for the use of batteries in the locker
- District Permits
  - EZLock will need to obtain a permit from the school district that will permit them to install the lockers in the schools that want them
- Fire Safety Requirements
  - EZLocks will need to meet the fire safety requirements of the schools/district in order to be allowed to install the lockers

Target market

- Primary Market- Commercial Locker Industry
  - Size of market: 1365.48M (Source)
  - Operated over 5 continents (22 countries) (Source)
- Secondary Market-Schools Districts/Schools
  - Operated over 5 continents (13 countries) (Source)
  - The top manufacturer is Penco Products (Source)

Product and Service Plan

Visual of Product

Description of product:

EZLock's lockers are designed to address the need for security and convenience in schools. These lockers will feature keypad entry, eliminating the need for combination locks, which can be challenging to open, or having physical keys that can be lost or stolen. The larger size of the lockers will accommodate backpacks, sports equipment, and other items that meet the demands of high school students. This offers several benefits as students can access their belongings quickly and easily and school administration is relieved of the burden of dealing with students losing keys, and having trouble opening their lockers. More importantly, EZLock's lockers aim to create a more secure environment for students.

EZLock's lockers provide a comprehensive security solution for schools by combining larger-sized lockers with keypad entry. This unique combination addresses the challenges of lost keys, stolen items, and limited storage space in traditional lockers. By prioritizing security and convenience, EZLock's lockers create a more positive learning environment for students and staff.

EZLock is currently in the ideation stage. The following steps will be to develop prototypes and conduct user testing that includes students and school administrators. This will allow EZLock to refine the design and ensure that it meets the specific needs of the target market,

Value Proposition Statement

EZLock lockers are designed **for** high school students**.** A recent survey found that only 8.8% of high school students use their lockers, and only 20.6% believe that lockers are important (All students get lockers, not many use them, 2019). This suggests that traditional lockers might not be meeting the needs of students.

The item is designed for people **who are dissatisfied with** the current structure and the combination lock's tediousness. Data from a recent Saint Ignatius High School survey points to potential dissatisfaction that students have with current lockers. The survey shows an underutilization of lockers. Based on the survey, 57.2% of students do not use their lockers, and 17.6% only use them several times per year (Coleman, 2023). This suggests that students are unwilling to use lockers due to factors such as minimal space or time. This highlights a clear opportunity to increase locker usage, as EZLock can address the issues that are causing this dissatisfaction among students.

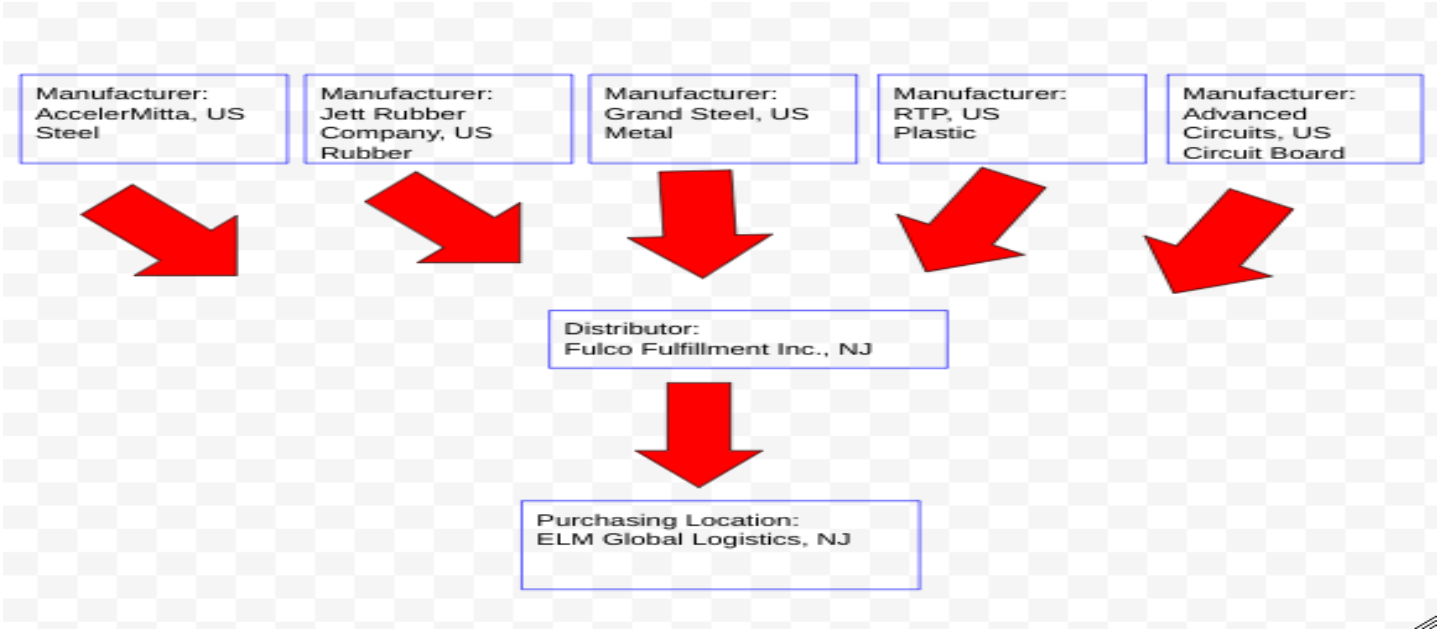

Our product is a convenient school locker that provides students with suitable spacing for their items. It has broad spacing, allowing for numerous items to be stored in the locker. This is crucial because students across the nation require space in their lockers to reduce backpack capacity. In a poll conducted by the student body of Saint Ignatius High School, 34.2% of students indicated that more locker usage would result from more immense sizes (Coleman, 2023). By providing lockers, fewer materials are supplied in their bags, also minimizing pain on their backs.

EZLock lockers are ones **that provide** a technological feature to increase efficiency. Aside from its bigger sizes, it includes keypad entry, a factor that could potentially motivate students into utilizing their lockers more regularly. Traditional lockers rely on combinations, which students can forget or lose, causing inconvenience. This influences students into relying on their backpacks more often. However, results from a college study convey that around 85% of students on a certain college campus experienced irritations from heavy backpacks (Lockers, 2022). Keypad entry with EZLock lockers could provide students with more space for the items that they need in an efficient manner, allowing for less physical discomfort.
https://debourgh.com/benefits-of-intelligent-lockers-in-schools/

Unlike Penco Products' standard lockers, EZLock lockers address the challenges students face with limited time between classes. With an average of only 4 minutes and 7 seconds for locker use (*2024 ASCD Annual Conference*, n.d.), students need a quick and easy solution. EZLock's larger lockers and keypad entry system provide a large advantage over Penco Products' lockers that have a smaller size and combination locks. Studies have shown that many students are dissatisfied with the size and difficulty of using combination locks that traditional lockers including those of Penco Products have (*About 20% of Students Don't Use the New Lockers*, 2017), leading to them not using their lockers. EZLock eliminates these frustrations by providing more space for storage and a convenient keypad entry system, allowing students to efficiently utilize lockers in between classes.

EZ LOCK

Supply Chain

Write up:

EZLock's lockers take a journey from raw materials to schools. It begins with various suppliers who provide key components such as metal coils, circuit boards, and plastic pellets. These suppliers are experts in their fields, ensuring EZLock gets high-quality materials. Next, these materials are transformed by specialized manufacturers. Metal workers use powerful machines to bend and shape the metal into locker doors, shelves, and frames. Electronics experts create code panels that keep belongings secure, and plastic specialists mold various components, like handles and hinges. An assembly facility is like a grand finale for all of these parts. Here, skilled workers bring everything together to create the finished EZLock locker. Well-coordinated teams work together, efficiently putting together all of the components. Finally, distributors and retailers take over. They act as a bridge, getting EZLock's lockers from the factories to EZLock storage facilities where they will be shipped out of. This complex journey ensures that EZLock's lockers are made with high-quality materials, assembled with care, and delivered conveniently to schools.

Industry Analysis

Micro Macro

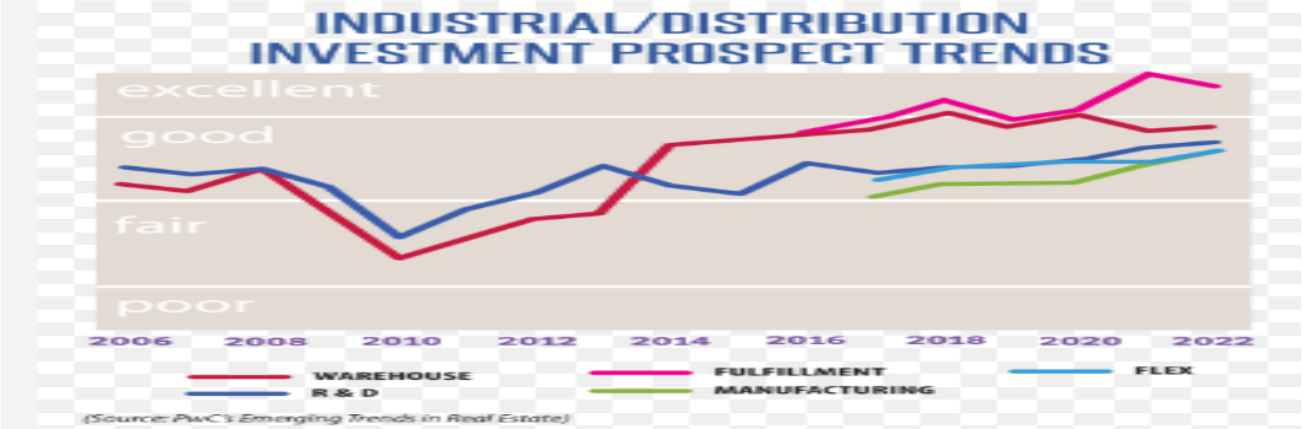

Additionally, EZLock can be affected by micro and macro influences. In micro, EZLock must keep an adequate and stable connection with its suppliers, customers, and employees, allowing for a good reputation. EZLock also must utilize money in a smart manner in order to receive assets and profit. On the macro side, EZLock must work with creativity in case of economic troubles. With creativity, we will be able to adapt to the struggles and thrive. With demographics towards high school kids, EZLock's products that integrate technology will allow for stable profit. Lastly, if there are fresh products in the market that compete in the locker market, EZLock will be able to maintain its prominence by improving the products with factors such as security, storage, and additional features. Ultimately, micro and macro influences play a major role in industries, and it is crucial for businesses to stay alert and adapt to their changes.

Industry and Sector Overview

Sector: Industrials

Industry: Locker Market

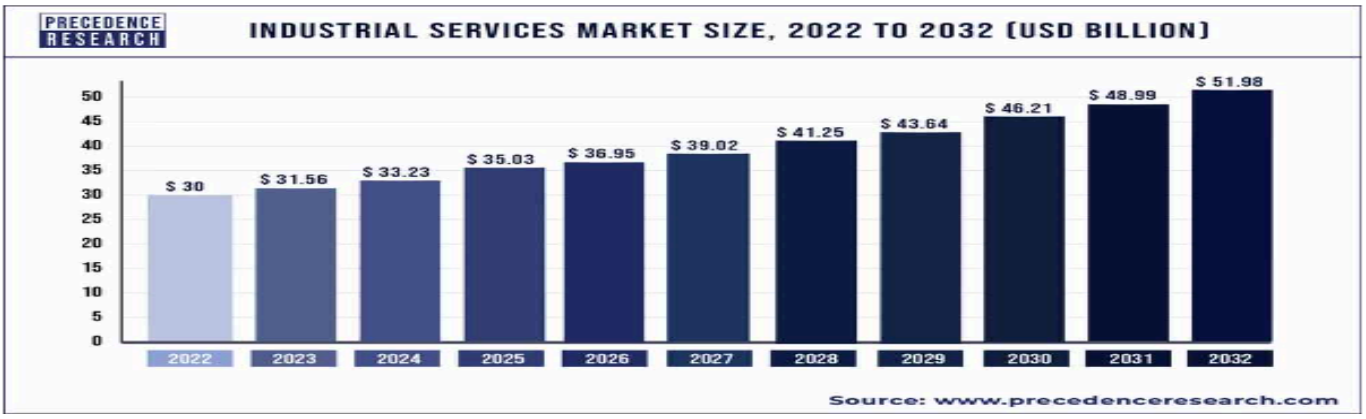

Investment Trends in the Industrials/Distribution Industry

Industrial and manufacturing construction trends for 2022. (n.d.). DBS Group. Retrieved April 12, 2024, from https://www.dbsg.com/blog/manufacturing-construction-trends-2022/

Summary: This chart represents the increasing amounts of stock investments that are in the industrial sector. The increasing amounts of investors will drive up the value of the stocks, and create higher revenue for the company.

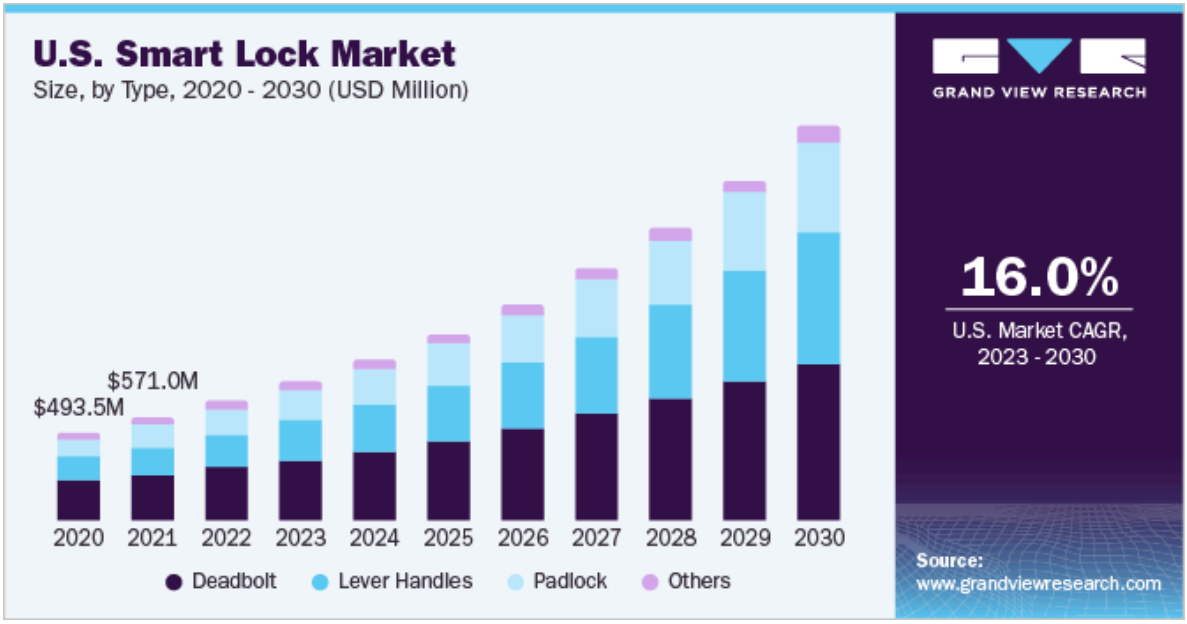

Size of the Industrial Service Market 2022-2023 (USD Billion)

Industrial Services Market Size To Surpass USD 51.98 Bn By 2032. (n.d.). Precedence Research. Retrieved April 12, 2024, from https://www.precedenceresearch.com/industrial-services-market

Summary: This graph represents the increased value of the industrial stock sector. The increasing value shows that more investors are investing in the sector and it is earning more revenue.

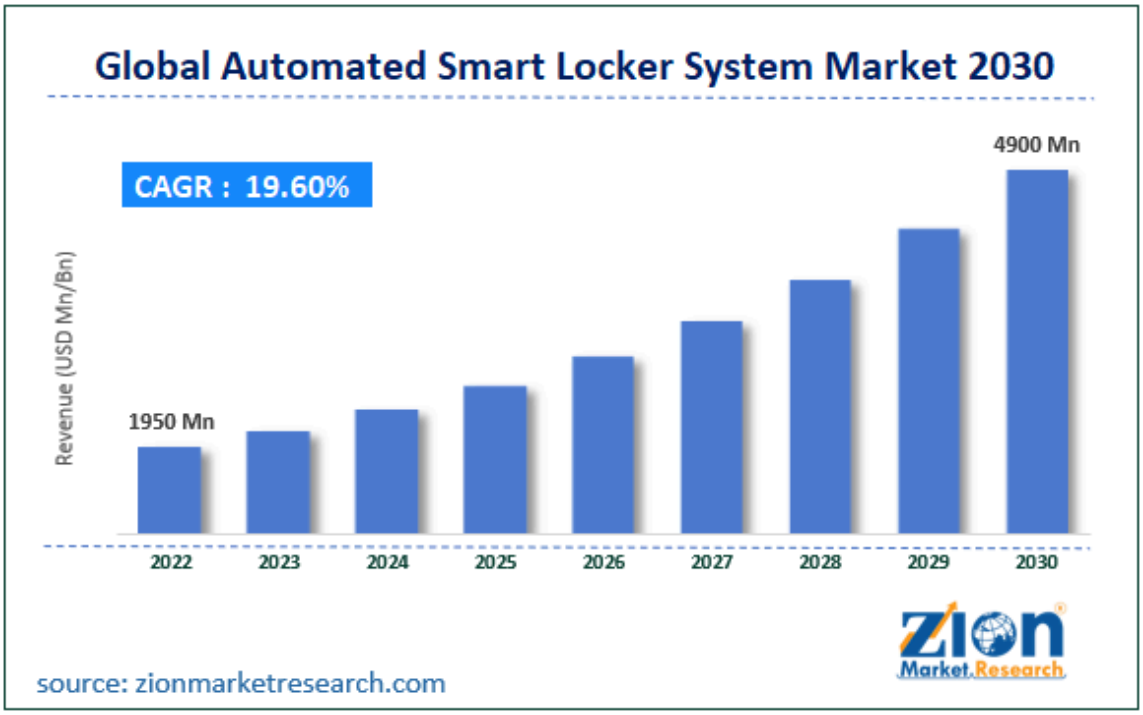

Size of the U.S. Locker Market from 2020-2030 by Type (USD Million)

Smart Lock Market Size, Share & Trends, Report 2030. (n.d.). Grand View Research. Retrieved April 12, 2024, from https://www.grandviewresearch.com/industry-analysis/smart-lock-market

Summary: This graph analyzes the popularity of the Lock Market Industry. More specifically, it conveys the prior, current, and projected valuation of four versions of locks. It is evident in the graph that the valuation of the industry exponentially skyrockets.

Revenue of Locker Market System Globally from 2022-2030

Zion Market. (2023, August 1). *Automated Smart Locker System Market Size, Share, Growth, Demand 2023-2030*. Zion Market Research. Retrieved May 1, 2024, from https://www.zionmarketresearch.com/report/automated-smart-locker-system-market-size

Summary: This data describes the growth of the Smart Locker System Market in the current decade. It is measured in millions and includes the Compound Annual Growth Rate, which is 19.6%. This is a satisfactory rate, and with the exponential growth, it is clear that the industry is on a good track.

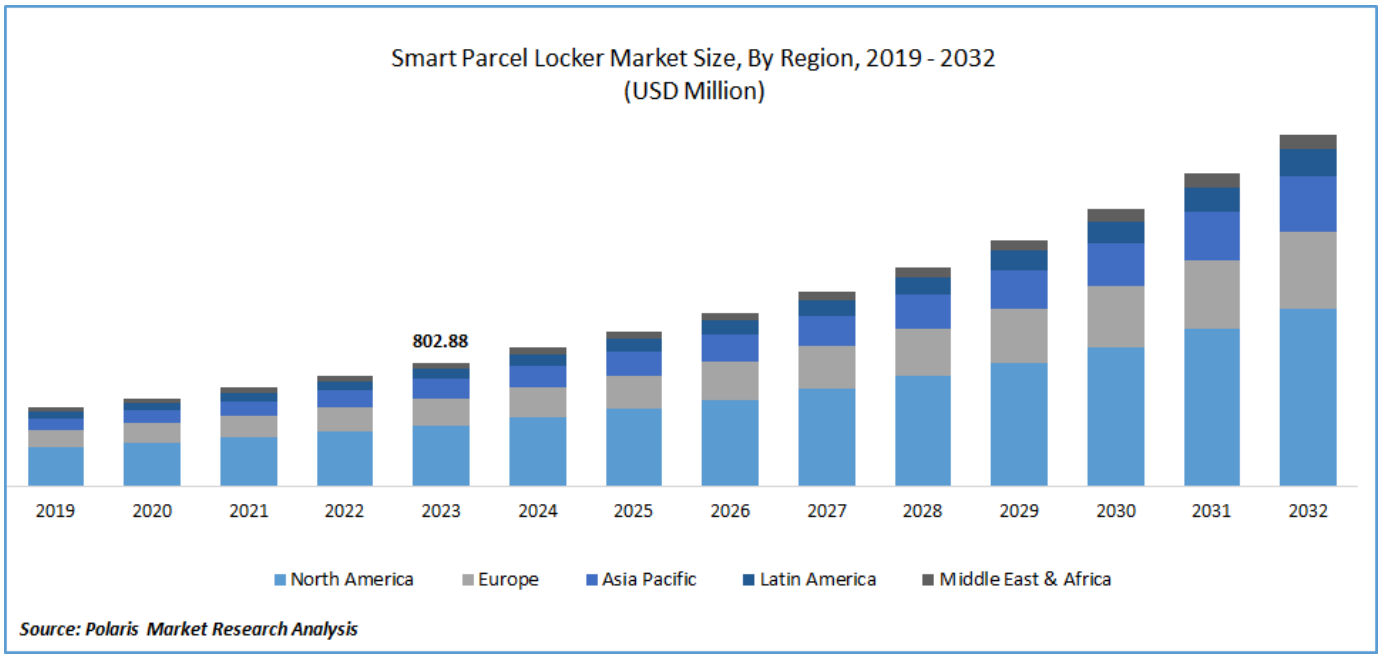

Industrials Market Outlook

Smart Lock Market Size, Share, Forecast, Analysis Report 2023-2027. (n.d.). Technavio. Retrieved May 1, 2024, from https://www.technavio.com/report/smart-lock-market-size-industry-analysis

Summary: This graph shows the projected growth of the industrial market up until 2027. This shows that EZLock's product will have stability going into the future.

Valuation of Smart Lockers by Continent from 2019-32

Polaris Market. (2024, February 05). *Smart Parcel Locker Market Size Global Analysis Report, 2024-2032*.

Polaris Market Research. Retrieved May 1, 2024,

https://www.polarismarketresearch.com/industry-analysis/smart-parcel-locker-market

Summary: The graph portrays the prior and projected growth of the smart locker market. However, this data is distinguishable from others due to its data by region. It conveys valuation by region, measured by American millions. It is evident that the market is growing stably.

Write-Up:

EZLock's product design is a keypad that will be utilized on lockers in schools to create easy access to lockers for students, saving time for students and providing them with extra space to store supplies. This product falls under the industrial stock sector. The main purpose of businesses in this sector is to distribute machinery, equipment, and supplies that are used in the production of other goods. EZLock's product falls in the industrial sector because their product will be utilized in producing lockers to install a hassle-free lock.

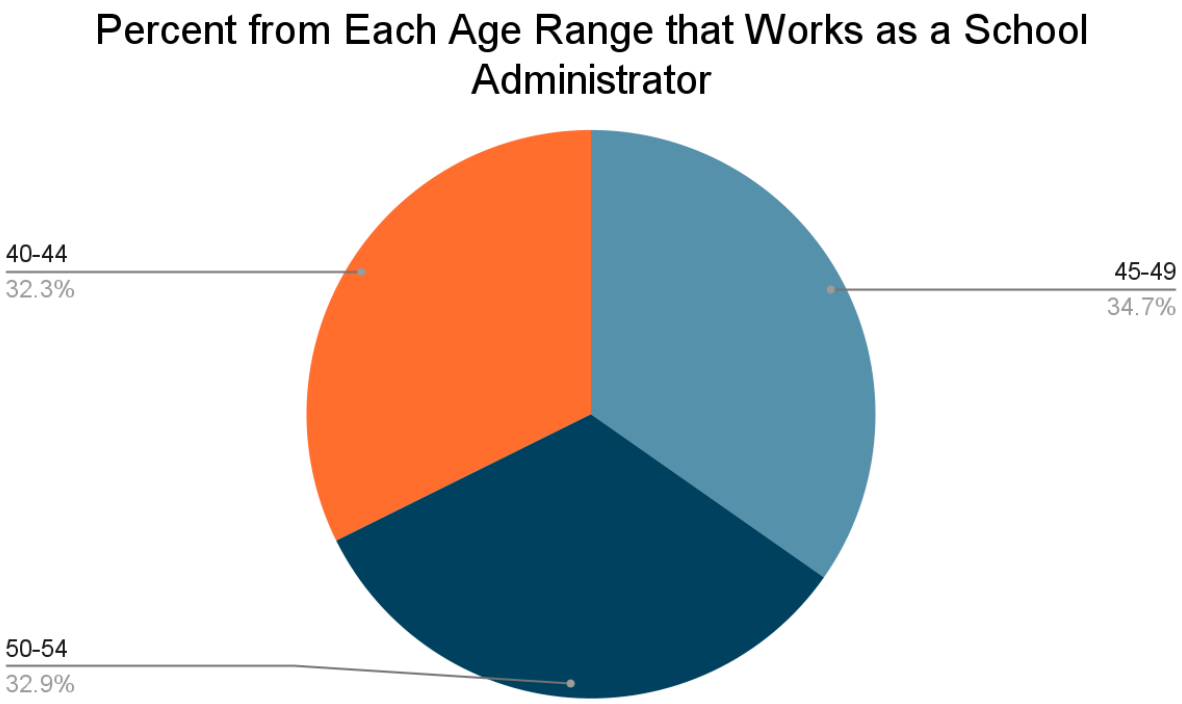

More specifically, the industry that EZLock's product falls under is the locker market. It includes various forms of the common container that stores your items. They are primarily in schools, gyms, or entertainment parks. Additionally, they have the common circular spin lock, smart locks with codes or key cards, or just a physical key. Some prominent creators of the products are MasterLock, Hollman, Inc., and Penco Products.

When looking at the market's future, it is projected to continue expanding. With society's advancement into the digital world, multiple items, such as the locker market, advance with them. Smart lockers with keys and cards are becoming more popular, making the process of opening faster and more efficient. Ultimately, the market is sturdy and expected to possess astounding performance.

Overall, the sector provides long-term stability as its trends show to be continuously rising. This is beneficial for EZLock because due to investors' high interest in the industrial sector, we will be able to make our product well-known. This will draw more interest from schools to purchase EZLock's products and will lead to increased revenue. Also due to the stability of the market, EZLock will be able to take risks in their business because it is likely that they will be able to recover easily. Based on these factors, EZLock will be able to thrive compared to others in the industrial sector.

Market Analysis

Primary Target Market Data

Source: Data USA

Write Up, Demographic Segmentation:

In school districts, administration members are in charge of purchasing lockers for all of the schools in the district. As shown in the study conducted by Data USA, members of the school administration are made up of members of Gen X, particularly those whose ages range specifically from 45-49. This is relevant to EZLock because this company incorporates technology such as keypad entry into their lockers, which is then sold to school administration members who are inclined to use new technology. According to the Pew Research Center, 91% of Gen X, which is the generation that the bulk of school administration members reside in, use the Internet in their daily lives. (Pew Research Center) This shows that they are willing to use technology like the keypad that is incorporated into EZLock's locker. Therefore, they would be interested in buying EZLock's locker for their respective school districts.

Write-up, Behavioral Analysis and Primary Data Analysis:

1. Behavioral Analysis
    a. Benefits that customers are seeking

Firstly, school administrators are seeking more security in their lockers as they want to limit theft and vandalism of other people's items within schools. Secondly, school administrators are looking for increased overall student satisfaction. They want to have products within schools that improve the overall student experience, including them feeling more secure and safe with storing their personal belongings in lockers. Lastly, school administrators are seeking more convenience in lockers. EZLock's keypad entry on their lockers will provide more convenience to students, which will create a more positive student experience.

    b. Motivations for purchase

School administrators want to improve student well-being as they prioritize student safety and a positive school environment. They are also looking for reduced locker maintenance costs. EZLock will reduce maintenance costs compared to traditional lockers.

    c. Purchasing trends

Lockers have begun to shift away from traditional locks. Padlocks and combination locks are being replaced with electronic options due to advancements in technology. Also, school administrators have a focus on technology. Gen X administrators are comfortable with technology and are more inclined to consider implementing keypad entry systems on the lockers that they purchase for their respective schools.

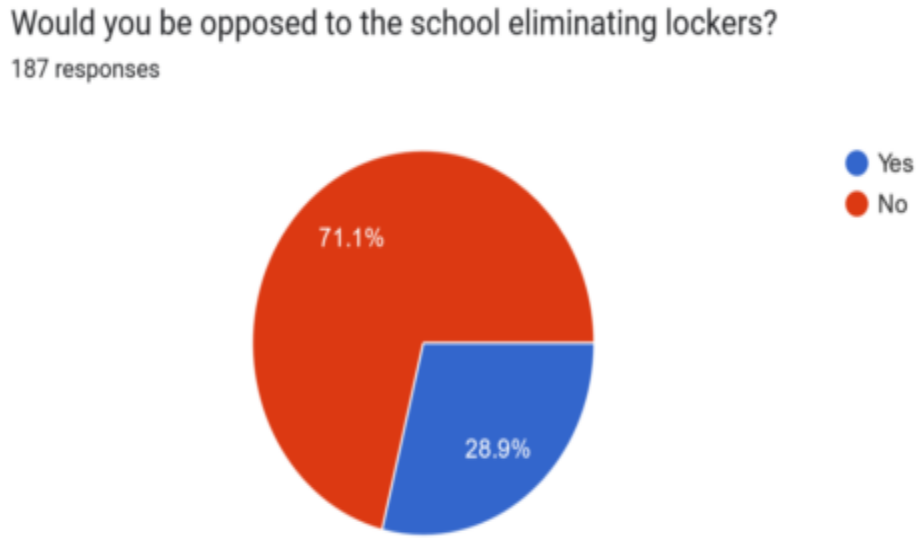

2. Primary data analysis

EZLock's target market consists of 2,525 high schools that are located within the Mid-Atlantic region of the United States. The decision-makers in their market are school administrators who are a part of Gen X (ages ranging from 45-49). The customers of EZLock's lockers (school administrators) are focused on purchasing lockers that will provide students with more security. They also want to install larger lockers in schools (as wanted by 65.8% of students). Within the locker industry, traditional padlocks and combination locks are being replaced with electronic entry systems. EZLock's lockers address the needs of both Gen X school administrators and students within the Mid-Atlantic region. By providing keypad entry, increased security, a larger locker size, and potentially lower maintenance costs, EZLock can position itself as a valuable solution to the locker dilemma within high schools.

Competitive Analysis

SWOT Analysis

SWOT Analysis:

EZLock

Strengths	Weaknesses
• Key advisors and executive producers • Thoroughly written business plan • Product differentiation • Access to social media and the internet • Thorough research conducted	• No capital • Recently started • Little resources (Employees, supply, etc.) • Little knowledge • Little time • No current potential buyers
Opportunities	**Threats**
• Not many competitors in the smart locker industry • Lots of time will be available in the future • Many marketing opportunities (Ex: Tiktok) • In this modern world, e-commerce is prominent	• Lockers are already implemented in schools, reducing demand • Possible hacking of physical product (Not secure) • Inflation • Competition in locker market (Not smart locker market) • Little time=delayed development and expansion of the business

SWOT Analysis: Largest Direct Competitor

Penco Products

Strengths	Weaknesses
• Numerous products • Running for a century • Immense resource supply (Employees, supply, etc.) • Lots of knowledge • 5 stars (Google Reviews)	• Basic products • Little care for workers • Rude managers • Loss of effort, development, and lack of modernization
Opportunities	**Threats**
• Utilization of Tiktok/Instagram for Marketing • Growing market • Strategic partnerships • Mergers and acquisitions (potential for rapid growth)	• EZLock • Smart Locker Market • Technology • Economic downturn (decreased consumer spending)

Write Up:

EZLock will overcome their weaknesses with determination and hard work. To commence, although EZLock has no capital, they will utilize crowdfunding to fund EZLock and be able to thrive in the market. Additionally, EZLocks's product incorporates technology and differentiates from other average lockers in the industry, for instance, Penco's Products lockers. To continue, Penco Products has rude managers and has little care for workers. The employees have a lack of effort, development, and modernization in certain workplaces. EZLock will be able to obtain an edge by treating all of its workers with care and providing them with equal benefits. EZLock will also hire managers who incorporate the Y-Theory to ensure that their workplace is a positive space where employees can work efficiently. Incorporating the Y-Theory will ensure that EZLock's employees are mentally healthy, motivated, and content to be working. EZLock will provide employees with small benefits such as snacks and promote a positive work environment to ensure that we are productive and efficient.

Value Proposition Chart

Company	EZLock - Self	Penco Products - Direct	Jansport- Indirect
Pricing	Not set yet	$155.95 per individual locker	$55..00 for one backpack
Accessibility	Easy accessibility - keypad is keypad to use	Moderate accessibility - combination lock can be difficult for some users	Easy accessibility - can easily buy the backpacks online or in stores
Personalization	No personalization offered	No personalization offered	Can choose colors for the backpack
Convenience	Very convenient, technology is more efficient	Moderately convenient, can take a while to open the locker with the combination lock	Very convenient, and easy to put the backpack on and take off
Brand Reputation	No current reputation due to start-up status	Reputable Company - recognized as the largest school locker provider	Reputable - known for their good quality of backpacks
Utilization of New Technology	Incorporates technology for security and convenience	No technology utilized for the company	No tech implemented into the product
Customer Satisfaction	Unknown - The product is not on the market yet	4.9/5 stars “Highest quality” (1716 people gave Penco Products 5 stars) (Source)	High, it is a go-to backpack brand for students

Write-Up:

EZLock's unique advantages consist of technological implementation and security. Firstly, the lockers sold have a keypad as opposed to a padlock or a combination lock. The goal of the device is to create convenience and efficiency in high schools. By making the process of a student visiting their locker more swift, they can reduce backpack capacity. Additionally, the keypad is less prone to theft, as locks cannot be "picked" nor manually broken into.

EZLock's prices and differentiation indicate a chance to thrive in the smart locker market. The prices are set at $455.50/locker tier. Due to consumer preference, demand for the product will increase, allowing for a higher cost in purchase. Furthermore, the product is convenient, and reduced backpack usage will diminish back pain for students. With the lockers, students will not spend lots of time tediously opening their combination locks, but instead inserting a robust yet simple code in seconds to place and receive school material.

Competitive Analysis Chart

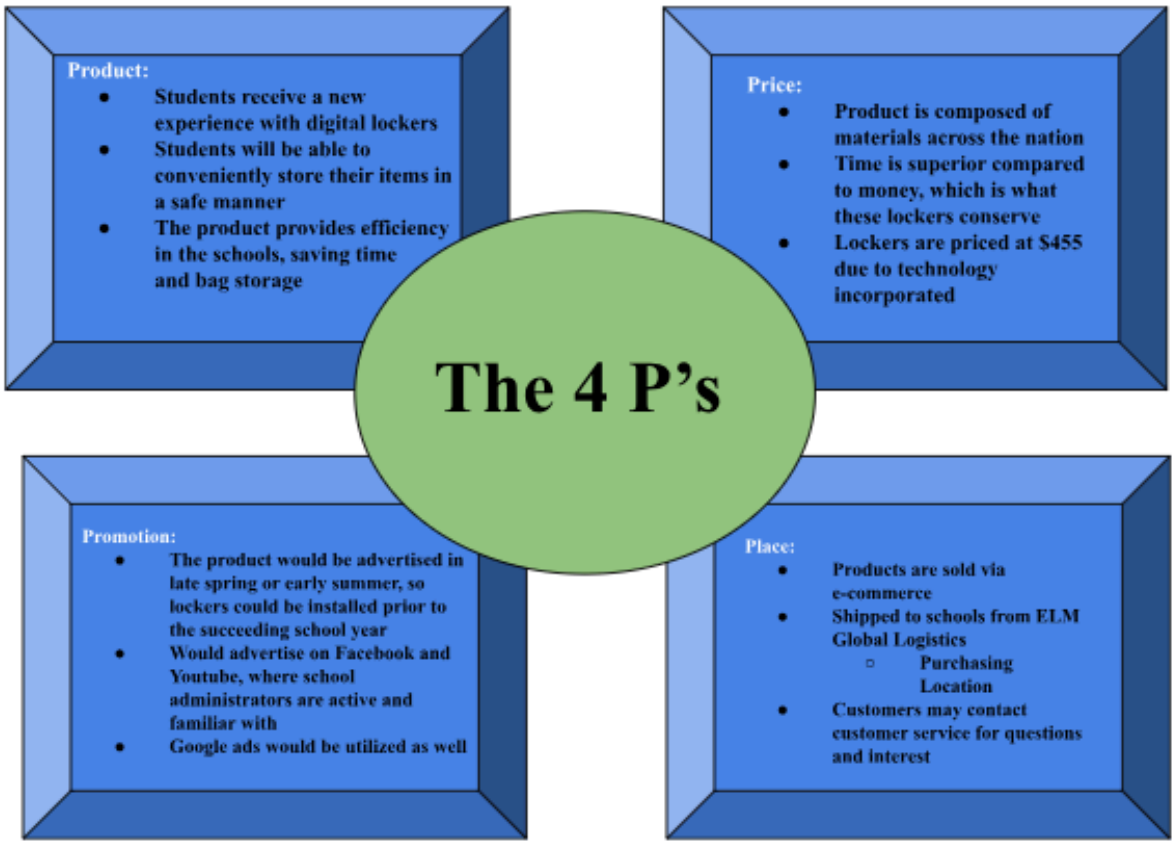

Company	EZLock - Self	Penco Products - Direct	Jansport- Indirect
Location	Marlboro, NJ	Bucks County, PA	Alameda, CA
Years In Service	0 years in service	155 years in service	57 years in service
Primary Service	School Locker Providers	Locker, Shelf, Racks, and Hygiene Product Providers	Backpack, Tote, Lunch Bags, and Clothing Providers
Reputation	No current reputation due to start-up status	Reputable Company - recognized as the largest school locker provider	Reputable - known for their good quality of backpacks
Target Market	High Schools	High Schools/Middle Schools	Students of all ages
Pricing	$455.50	$155.95 per individual locker	$38.00 for one backpack

Write Up, Competitive Analysis:

EZLock is a new company that is entering the high school locker market, competing against established companies like Penco Products with 155 years of experience and a reputation as the largest school locker provider. While both companies target high schools, EZLock focuses on a unique feature: a keypad entry system for lockers. This technology offers potential benefits for both students and administrators, such as increased convenience and security. By effectively communicating these advantages, EZLock can position itself as a modern and innovative solution for high schools. Although the price of the lockers may seem high, schools are paying additional for new technology, convenience, and lower long-term costs that other competitors do not offer.

Marketing Plan

The 4 P's:

Write-Up:

The 4 P's are an important part of business as they indicate how a company runs and its differentiation. Firstly, EZLock's **product** is unique because of its technology and convenience. Students will be able to quickly retrieve and place items in a fast manner to get to class on time. Additionally, by storing items in a locker, there is less weight on a student's back, reducing physical strain. Furthermore, the price amounts to $455.50 as materials are transported nationwide and technology is incorporated. As for the customers, time is the most important resource one can acquire, so these lockers aim to provide it. To spread prominence, EZLock will promote during the summer right before the school year so that lockers will be installed in schools by September. More specifically, Facebook, YouTube, and Google Ads would be utilized to spread awareness of the product. Lastly, with e-commerce, locker tiers would be shipped through trucks with ELM Global Logistics, EZLock's primary storage facility. If consumers have questions, they can contact the business through the customer service system.

Logo and Slogan

EZLock Logo

Slogan: Making Storage **EZ**

Write Up:

The logo consists of a locker to indicate what EZLock's product is, however, there is also a keypad to portray the technological differentiation. We incorporated the color blue to symbolize EZLock's security, and the black conveys their sophistication and professionalism. The logo aims to express EZLock's care for safety and the use of technology to further improve security in schools.

Additionally, EZLock's slogan conveys the company's overall goal, which is to provide a convenient storage option for students in high schools. EZLock's slogan encompasses the goal in a short phrase that will be recognizable by school administrators looking to purchase the lockers for their respective schools. EZLock will tie this slogan to their product by using it in advertisements that will market the product to consumers, causing consumers to associate the slogan, which represents the goal of the company with the product.

EZ LOCK

Advertisements:

Advertisement 1 (Deal)

Write-Up, Advertisement 1:

The advertisement uses bold colors (red and blue) and a clear image of the EZLock locker to grab attention. The locker itself is positioned prominently, with enough detail to show the keypad, which will draw the consumer's attention to EZLock's USP. To add on, the title at the top of the advertisement "Grand Opening Sale" expresses that the sale is only for a limited time, making consumers feel a sense of urgency to purchase the lockers. Lastly, the advertisement uses a discount strategy to incentivize early sales during the "Grand Opening Sale". It highlights the amount saved and the discounted price to make the offer visually appealing. Overall, the advertisement uses clear visuals, a strong call to action, and a limited-time discount to capture the interest of consumers in purchasing the lockers.

EZ LOCK

Advertisement 2 (Promotional)

YOUR STUDENTS MATTER.

School Lockers

KEYPAD LOCKERS TO INCREASE LOCKER USAGE WITH EFFICIENCY AND COVENIENCE

EZLock strives to support and assist students with its simple lockers. According to a school survey, 71.1% of the students do not support the use of school lockers.

Contact Us:

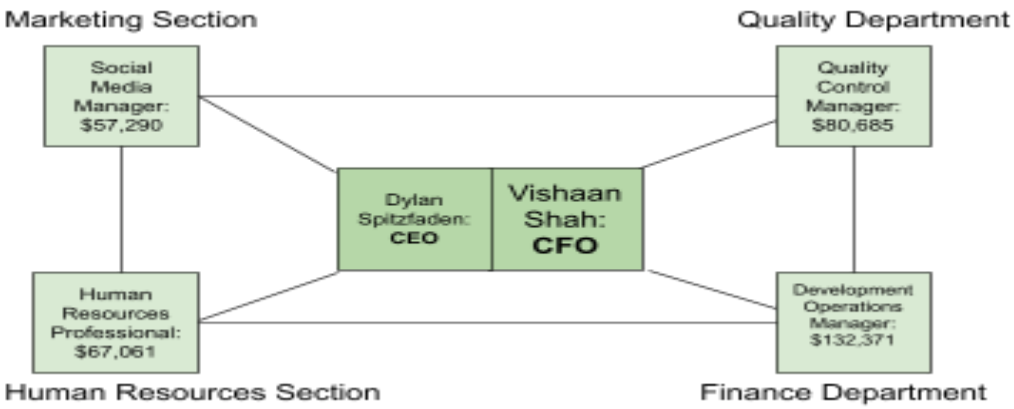

www.ezlock.com
732-123-LOCK
527vshah@frhsd.com
527dspitzfaden@frhsd.com

Write-Up, Advertisement 2:

The advertisement still fits with the blue and black theme to convey EZLock's security and professionalism. Modern designs were implemented on the right-hand side to increase the quality of the ad, as well as an image to provide EZLock's viewers with a glimpse of the product. In the top left, the importance of the students is emphasized to highlight EZLock's care for the student experience in the school. Below EZLock's call to action, which is intended to persuade viewers to purchase the product, it details how the product is the best in the state by describing the differentiation. Also, logos are utilized to give the viewers exposure to the minimal usage of school lockers. Lastly, the company contact info is written in the bottom left corner, including social media, the website, phone number, and email addresses.

Organizational Plan

Write-Up:

First, Dylan is the CEO, so he makes all of the final decisions for the company. Vishaan is the CFO, so he controls all the financial matters in the company. As for the employees, each plays a unique yet significant role in the company. The social media manager assists in the promotion of EZLock through Facebook, YouTube, and Instagram. This individual resides in the marketing section, as he works towards familiarizing people with EZLock. Next, the Human Resources Professional controls customer relations and experience with the product. In case of any issues, concerns, or questions, this is the person to contact. A quality control manager will be beneficial for EZLock as they will ensure that the lockers that EZLock produces are high quality and meet all safety standards. This will lead to reduced costs as fewer detective lockers will be produced, saving money on materials and labor. Customers will also be more satisfied because they will receive high-quality lockers. It will also lead to an improved reputation due to EZLock's high-quality lockers and safer products as a quality control manager will be able to help identify and address potential safety hazards that the lockers have. To continue, a development operations manager can help EZLock streamline the development and deployment of the software that is integrated into the keypad in the lockers. This would lead to a faster time-to-market because streamlining development can allow EZLock to get new features and provide updates to companies faster. Development operation managers can also help automate tasks and implement processes that will reduce errors in software development. They will also provide more efficiency as they can help development teams work more efficiently and collaboratively. Lastly, development operations can identify and address potential issues before they turn into actual problems.

Appendix - Feasibility Analysis

PRELIMINARY BUSINESS PLAN BRAINSTORMING

1. WHAT TYPE OF BUSINESS ARE YOU INTERESTED IN FORMING? (EX: RETAIL SALES, SERVICE, WHOLESALER, ETC…)

   We aspire to pursue business-to-consumer (B2C), as we can make our product easily available while producing it at the highest quality and fastest rate.

2. SEARCH FOR AN AVAILABLE NAME FOR YOUR BUSINESS

   EZLock

3. CONSIDER THE TYPE OF BUSINESS OWNERSHIP; COMPLETE RESEARCH ON THE VARIOUS FORMS OF BUSINESS OWNERSHIP. DISCUSS AT LEAST 2 FORMS OF OWNERSHIP (LEGAL STRUCTURE) THAT YOU MAY UTILIZE IN THE FORMATION OF YOUR BUSINESS.

   Two types of business ownership that we can utilize in the formation of our business are an LLC and an S corp. An LLC would be beneficial in this formation of our business because it is easy to start up, contains limited liability, has unlimited partners, has unrestricted pay, and there is tax flexibility. Additionally, we could also utilize an S corp structure in the formation of our business because there is limited liability, no double taxation, losses can be passed through to shareholders, there are lowered self-employment taxes, and it is easy to convert to C corp taxation at any time.

4. WHAT ARE YOUR LOCAL, STATE, REGIONAL, NATIONWIDE, GLOBAL, (INCLUDING E-COMMERCE) COMPETITION?

   State: National Lockers and Shelving, AtmosTech Industries Source

   Regional: Hallowell Source#1, Wurth Baer Supply Company Source#2

   Nationwide: Republic Storage Systems Corporation Source#1, Hertz Furniture Source#2

   Global: SchoolLockers Source#1,

5. PROVIDE A BRIEF INDUSTRY ANALYSIS TO DETERMINE IF THERE IS AN UPWARD TREND IN GROWTH FOR YOUR INDUSTRY. PRELIMINARILY, YOU MUST INCLUDE AT LEAST 4 GRAPHS OR CHARTS AND A ONE PAGE WRITTEN ANALYSIS OF THE INDUSTRY. YOU MUST PROVIDE PROOF THAT THIS INDUSTRY WILL SUPPORT NEW GROWTH.

Summary: This graph analyzes the popularity of the Lock Market Industry. More specifically, it conveys the prior, current, and projected valuation of four versions of locks. It is evident in the graph that the valuation of the industry exponentially skyrockets.

Revenue of Locker Market System Globally from 2022-2030

Zion Market. (2023, August 1). *Automated Smart Locker System Market Size, Share, Growth, Demand 2023-2030*. Zion Market Research. Retrieved May 1, 2024, from https://www.zionmarketresearch.com/report/automated-smart-locker-system-market-size

Summary: This data describes the growth of the Smart Locker System Market in the current decade. It is measured in millions and includes the Compound Annual Growth Rate, which is 19.6%. This is a satisfactory rate, and with the exponential growth, it is clear that the industry is on a good track

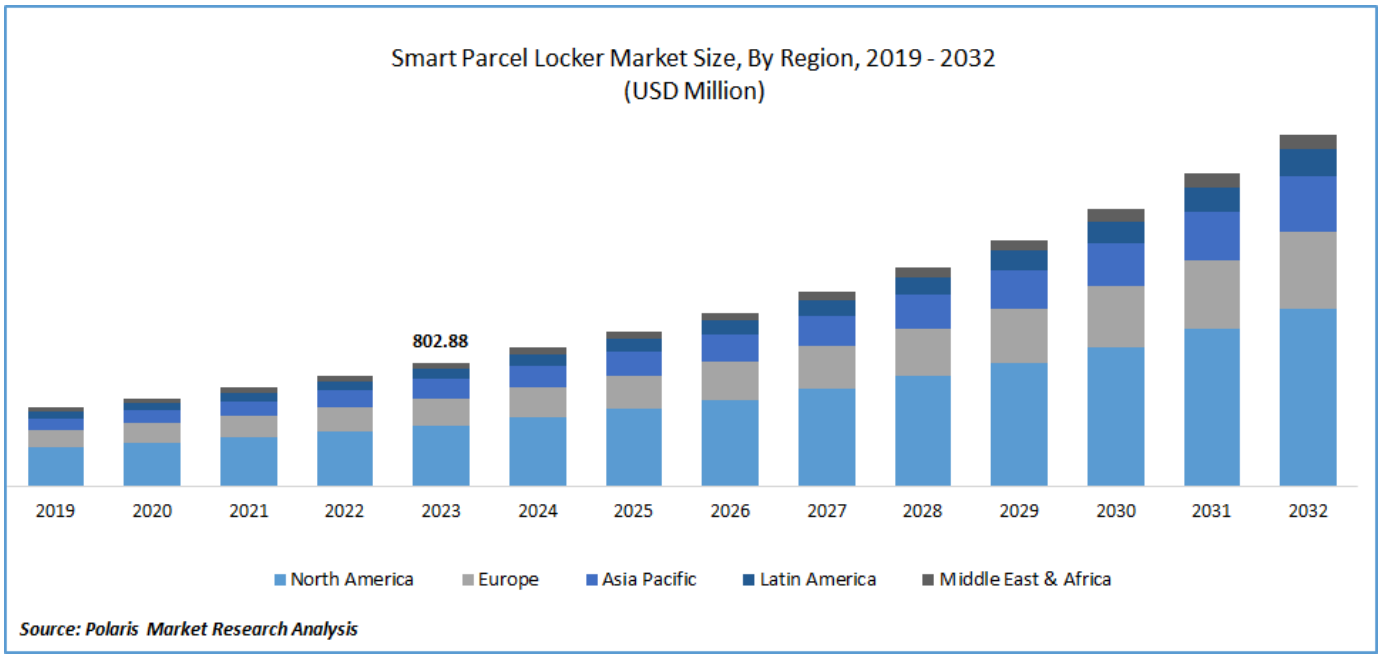

Industrials Market Outlook

Smart Lock Market Size, Share, Forecast, Analysis Report 2023-2027. (n.d.). Technavio. Retrieved May 1, 2024, from https://www.technavio.com/report/smart-lock-market-size-industry-analysis

This graph shows the projected growth of the industrial market up until 2027. This shows that EZLock's product will have stability going into the future.

Valuation of Smart Lockers by Continent from 2019-32

Polaris Market. (2024, February 05). *Smart Parcel Locker Market Size Global Analysis Report, 2024-2032*. Polaris Market Research. Retrieved May 1, 2024, https://www.polarismarketresearch.com/industry-analysis/smart-parcel-locker-markt

The graph portrays the prior and projected growth of the smart locker market. However, this data is distinguishable from others due to its data by region. It conveys valuation by region, measured by American millions. It is evident that the market is growing stably.

EZLock's product design is a keypad that will be utilized on lockers in schools to create easy access to lockers for students, saving time for students and providing them with extra space to store supplies. This product falls under the industrial stock sector. The main purpose of businesses in this sector is to distribute machinery, equipment, and supplies that are used in the production of other goods. EZLock's product falls in the industrial sector because their product will be utilized in producing lockers to install a hassle-free lock.

More specifically, the industry that EZLock's product falls under is the locker market. It includes various forms of the common container that stores your items. They are primarily in schools, gyms, or entertainment parks. Additionally, they have the common circular spin lock, smart locks with codes or key cards, or just a physical key. Some prominent creators of the products are MasterLock, Hollman, Inc., and Penco Products.

When looking at the market's future, it is projected to continue expanding. With society's advancement into the digital world, multiple items, such as the locker market, advance with them. Smart lockers with keys and cards are becoming more popular, making the process of opening faster and more efficient. Ultimately, the market is sturdy and expected to possess astounding performance.

Overall, the sector provides long-term stability as its trends show to be continuously rising. This is beneficial for EZLock because due to the high interest that investors have in the industrial sector, we will be able to make our product well-known. This will draw more interest from schools to purchase EZLock's products and will lead to increased revenue. Also due to the stability of the market, EZLock will be able to take risks in their business because it is likely that they will be able to recover easily. Based on these factors, EZLock will be able to thrive compared to others in the industrial sector.

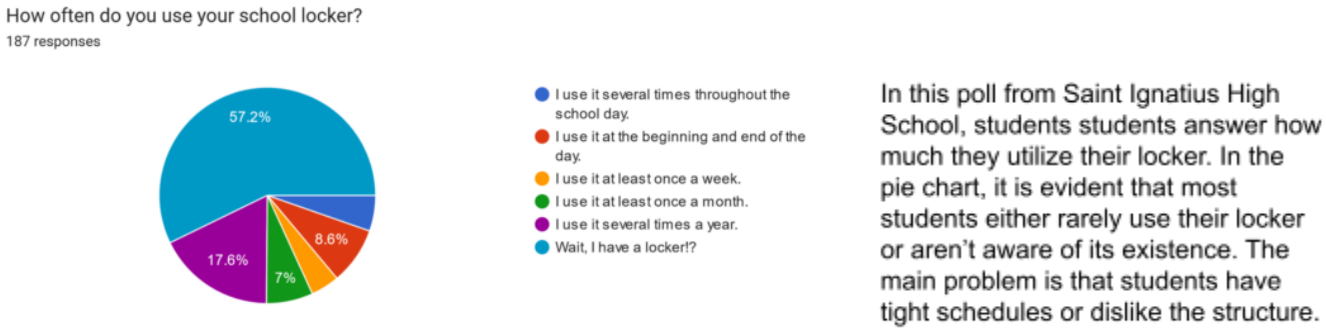

6. PROVIDE THE NICHE MARKET OR DEMOGRAPHICS FOR YOUR TARGET CLIENTELE. YOU MUST PROVIDE AT LEAST 2 GRAPHS OR CHARTS UTILIZING WEBSITE RESOURCES SUCH AS CENSUS.GOV. TO SUPPORT YOUR MARKET. INCLUDE ANY RELEVANT DEMOGRAPHIC INFORMATION ANNUAL INCOME, AGE, ETHNICITY, SEX, ETC….)

EasyLock's niche market is high schools with Underutilized Lockers Due to Short Class Transitions and Students Carrying Heavy Loads

Student Poll of Locker Elimination in Saint Ignatius High School

Poll On How Often Students in St. Ignatius High School Use Their Locker

Coleman, K. (2023, February 27). *Saint Ignatius Locker Poll*. Saint Ignatius Eye. Retrieved April 13, 2024, from https://www.saintignatiuseye.org/2023/02/27/saint-ignatius-locker-poll/

7. DESCRIBE YOUR POSSIBLE PRODUCTS OR SERVICES? WHAT IS THE LOCAL PRICE POINT OR RANGE FOR THESE PRODUCTS OR SERVICES? ARE THESE PRODUCTS VALUE PRODUCTS/SERVICES OR PREMIUM PRODUCTS/SERVICES?

The product that we plan on producing is a keypad-integrated school locker. Students will enter a four-digit code into the keypad which will allow them to easily open the locker. It will save the excess time that is used up at lockers by combination locks. The selling point for a single locker would be $445.50. It is considered a premium product because the locker includes a keypad for entry which is a feature that most lockers in schools do not have.
